Project Name: Crowborough Tunnel Brickwork and concrete repairs

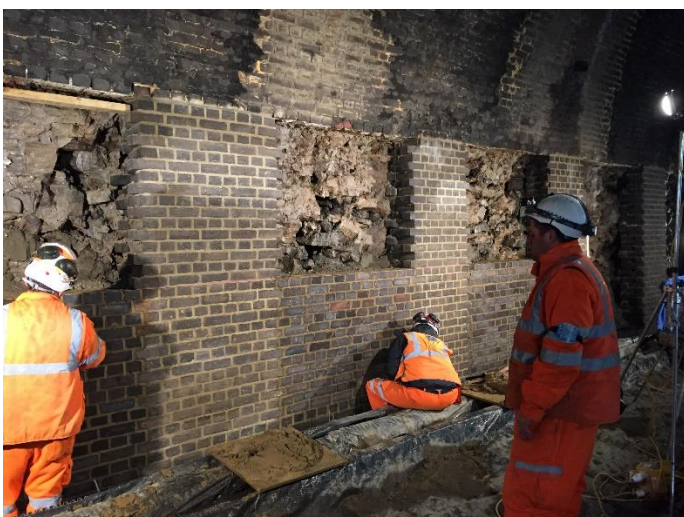

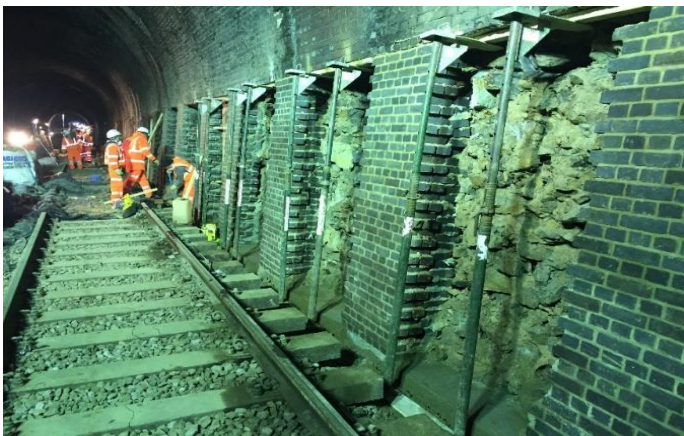

Client: B&M McHugh

Approximate Value: £450,000

Duration: 12 weeks (2016)

Description of Services: ASH supplied tools and equipment, skilled labour and supervision on all the Brickwork repairs and replacement throughout the 1100yds tunnel. Works were undertaken during a blockade with the majority being completed during a 24/7 (8-week period). 1m square sections of damaged brickwork were then re-cased using hand breakers and strong boys installed to support the brickwork and concrete above, debris and loose material was then removed by hand and brickwork reinstated with concrete behind to pack and fill voids. Existing troughing routes were also removed and reinstated as part of these works. 2 Teams of 20 staff worked around the clock progressing through the site starting and completing the sections before progressing to the next location.
